Description

Anemone 'Jasmine' is a new addition to the *Fantasy series* with tough, single pink blossoms surrounding whorls of bright yellow stamens. It has an upright habit and 6" taller than the shorter varieties. Persisting for weeks, the eye-catching flowers of this Anemone attracts pollinators. It is deciduous and requires low care. This well-behaved beauty is a wonderful naturalizer that is perfect for adding a splash of color to the late season garden. They are great for front borders, mass plantings, ground covers and containers and great for urban gardens. They are superb for cutting.
