

Eupatorium dubium

Little Pye

Joe Pye Weed (NATIVE)

Price : \$15.00

Price includes 6% MD sales tax

Exposure Full Sun, Part Shade

Height 24" - 30"

Spread 12" - 36"

Spacing 30"

Bloom Color Mauve - Pink

Bloom time Summer - Fall

Deer Resistant Yes

USDA Hardiness Zone 6 - 10

Description

Eupatorium dubium 'Little Pye' is a upright perennial with unbranched stems boasting large dome-shaped clusters of small, fragrant, mauve flowers in mid summer to early fall. It is a miniature Joe Pye Weed perfect for smaller gardens. Borne atop erect, strong stems, the long-lasting blossoms are attractive to butterflies, songbirds and pollinators in search of nectar. They give way to attractive, soft buff colored seed heads, which persist well into winter. Native primarily to sandy swamps, riverbanks and moist thickets in Eastern North America, this species grows easily in a wide range of soils and in full sun to part shade. It can be used in the informal setting of a cottage garden, smaller cutting gardens and in mixed borders or containers.
