Cloud Nine (NEW)
Cranesbill (NATIVE)

Price : \$15.00

Price includes 6% MD sales tax

Exposure Full Sun

Height 12" - 18"

Spread 8" - 12"

Spacing 10" - 12"

Bloom Color Double Pale Blue

Bloom time Spring - Summer

Deer Resistant Yes

USDA Hardiness Zone 5-8

Description

Hardy Geraniums are always popular. Geranium pratense 'Cloud Nine' has fully double, pale blue flowers appear above attractive, finely cut foliage from May to June with a second flush in late summer. Large extremely cut leaves are interesting unto themselves. This strong growing Cranesbill is disease resistant, and rarely damaged by slugs or rabbits. With a vigorous, mounding habit it will quickly bulk up to fill gaps in the front of mixed borders, where its nectar rich blooms will attract plenty of pollinating insects especially bees. It makes a good cut flower lasting for about 10 days!
