

Heuchera x
Peach Flambe
Coral Bells (NATIVE)

Price : \$15.00

Price includes 6% MD sales tax

Exposure Full Sun, Part Shade

Height 7"

Spread 7" - 18"

Spacing 18"

Bloom Color Light Pink

Bloom time Early Summer

Deer Resistant Yes

USDA Hardiness Zone 4 - 9

Description

Peach Flambé Heuchera is a clump-forming coral bells hybrid that features lobed and rounded bright peach leaves infused with red. It provides multi-seasonal interest as a superb color companion with spring yellows, summer blues, and fall oranges. It is a vigorous, medium-sized plant that produces white flowers in spring on 16" stems. Bright peach-colored leaves that literally glow in spring, summer and fall, turning to plum in winter. It is great as mass plantings or in groups, rock gardens, borders and open woodland gardens. Effective as an edger along paths or walkways. It attracts bees, butterflies and hummingbirds.
