Other attractive green foliage, long-blooming, yellow flowers and pink berries; compact habit, pollinator and bird friendly.

Description

Hypericum Miracle horizon commonly called St. Johns Wort, is a small, dense, evergreen shrub that typically grows in a dense mound to 2-3' tall. Five-petaled, golden yellow flowers bloom in abundance covering the entire plant from mid to late summer and with berries that attract birds and other wildlife through Fall. Green foliage that turns red in fall. This plant is perfect for containers, mixed borders, ground cover and foundation plantings.
