## **Description**

Sweetspire is one of the most shade-tolerant flowering shrubs and Scentlandia™ is nicely compact, erect and works well in any sized landscape. The showy inflorescences are made up of small, fragrant, white flowers that bloom in late spring through early summer on the terminal ends of the branches. Oval, dark green leaves (turn varying shades of red, orange and gold in autumn. Attractive to butterflies and other insect pollinators. It is both cold and drought tolerant.
