USDA Hardiness Zone 3 - 8

Description

Monarda didyma 'Jacob Cline' is considered to be the very best red variety. These tall plants add vertical accent to the back-of-the border. This Monarda is a colorfully vibrant, mildew-resistant variety of the Bee Balms and is an incredibly vigorous cultivar, producing an abundant display of large, red flowers. Loved by both gardeners and hummingbirds, crimson red crown-shaped blooms appear on tall, herbaceous plants in mid summer. Its fragrant foliage and tolerance of pests, mildew and clay soils make it a perennial favorite. Hummingbirds love them! A carefree strong grower.
