Other Show stopping flowers with disease excellent disease resistance; long blooming; heat tolerant and disease resistant; attracts pollinators.

Description

Brindabella Pink Princess has a bushy growth habit, excellent disease resistance, and fragrant pink doubled flowers. These low maintenance roses are very vigorous and grow to only 4 feet tall and wide in 2 years' time. This is an ideal landscape rose that is disease resistant, easy to grow, and works in both landscapes or containers. It is a reblooming rose from early summer until fall with little to no deadheading required.
