

Rudbeckia fulgida var fulgida

Black-eyed Susan (**NATIVE**)

Exposure Full Sun, Part Shade

Height 24" - 30"

Spread 12" - 24"

Spacing 12" - 18"

Bloom Color Yellow

Bloom time Late summer

Deer Resistant Yes

USDA Hardiness Zone 3 - 9

Price : \$15.00

Price includes 6% MD sales tax

Description

Rudbeckia fulgida var fulgida blooms later than most other Rudbeckia. This Black Eyed Susan is very attractive to butterflies and the seed heads provide winter food for seed-eating songbirds as well. This perennial plant is long-lived and reliably produces masses of rich golden yellow, flowers (from midsummer through early fall, no matter what the weather is like. Each flower has many ray-like petals surrounding a dark brown cone in the center, providing fantastic warm color in the late summer garden. Rudbeckia tolerates both drought and clay plus easy to maintain.
